

SPINRITE®

Slow-Spin Tunnel Wash Series

Operators want to offer something “different” to their customers—something that their competitors can’t match. SpinRite slow-spin equipment offers you a better chance to transform first-time customers into loyal clients with an entirely new approach to tunnel car washing—in terms of both performance and perception. Pair that with SpinRite’s proven wash results, and you’ll have customers that look forward to each return trip to your wash.

The SpinRite system is unlike any other in terms of cleaning power and customer experience—it’s truly different and truly effective. You’ll know this when your customers rave about their clean, dry, and shiny cars, as well as their fun and relaxing trips through the tunnel.

Every time a shiny vehicle exits, it marks the finale for that trip to the wash, but it also shows that you’ve earned another happy customer. Happy customers become loyal customers—which means higher revenues and better returns. That’s what makes SpinRite a different, better way to wash.

Inspired By You. Built By Belanger.

A Better Touch, A Better Clean

SpinRite's slow-spinning wheels are different. The self-supporting patented ShineMitt media design allows the SpinRite cleaning wheels to spin at 1/3 the speed of traditional car wash equipment, while delivering a superior clean without damage.

ShineMitt media mimics the purposeful cleaning action of the human arm, hands, and fingers to touch and clean better. The fingers contour on contact, exposing multiple cleaning edges to lift dirt from the surfaces of the vehicle. This delivers a noticeably better clean, with over 4 times the touches of traditional media.

Quietly Better

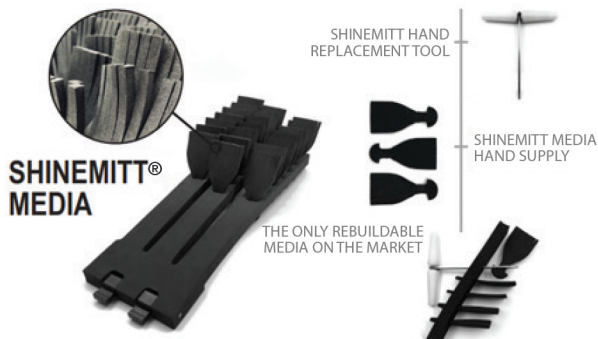

As ShineMitts rotate at 1/3 the speed of traditional fast-spinning wheels, it makes sense that SpinRite is more than twice as quiet.

The effects of the reduced noise level and lower frequency sounds aren't just noticeable – they're dramatic. Customers are more relaxed, visibly less anxious, and less apprehensive. They are less likely to be worrying about vehicle damage. Most importantly, they are free to sit back and enjoy the car wash.

For SpinRite operators, the quiet operation and gentle wash process ensures a customer's first visit won't likely be their last. Operators can enjoy higher ROI, as customers return to experience SpinRite again and again. Word-of-mouth marketing alone will help accelerate the growth of your wash club membership program.

The Shinemitt® Advantage

Belanger's patented ShineMitts are stronger in design than traditional media and offer the industry's only rebuildable wash media. If a ShineMitt 'hand' comes loose, simply replace the hand, not the entire stalk. ShineMitts only cost around \$1.00 each and can be easily replaced without any downtime or hub disassembly. That not only saves operators a lot of time, but also a lot of money!
