

# AccuSpin

## Cleaning Power+ Worry-Free Operation

The Accuspin top wheel provides the perfect combination of cleaning power and worry-free operation.

The Accuspin is available in entrance-facing, exit-facing, and counter-rotating dual top washer configurations which offers several exciting advancements. With revolutionary pneumatics that quickly positions the top wheel for customized cleaning and the rebalanced design pivot point that provides optimal balance throughout the complete range of motion results in smoother operation and superior cleaning for every vehicle.

This unique approach results in improved cleaning with less equipment and provides a quieter wash with less vibration for a superior customer experience as well as fewer damage claims, all of which will help you differentiate your car wash from the ever-increasing competition in your market.

## Single and Dual Top Wheel

### Top Wheel Features & Benefits

- o Closed cell foam material prevents water absorption, maintains consistent weight of the top wheel, and delivers the most accurate application of pressure to deliver enhanced wash quality
- o Lubrication bar matches the washer's width to ensure consistent lubricity. Single lubrication bars are available for entrance-facing and exit-facing top wheels, and dual lubrication bars are available for counter-rotating dual-top wheel configurations.
- o Dual top wheels features nested configuration which requires only 10' 6" of tunnel space
- o Exit-facing top wheel provides excellent cleaning of grill and front clip of vehicles
- o Entrance-facing top wheel provides excellent cleaning on tops and rears of vehicles
- o Enlarged base provides stability
- o Stainless steel construction provides durability and long life

## REQUIREMENTS & SPECIFICATIONS

### Physical Examples

Required Conveyor Space:	10 ft
Required Height:	12 ft

### Utility Examples

Electric	480/208 V AC
Hydraulic	4 GPM
